Happiness is the *destination.*

Our story

Happy Holidays is a Bhutanese tour operator welcoming travellers to the Land of the Thunder Dragon. We design journeys through dzongs, valleys, festivals and villages — guided by people who call Bhutan home.

Our promise

Every guest leaves a little happier than they arrived. We handle every detail — permits, SDF, flights, hotels, guides — so the only thing travellers have to do is be present.

Brand idea

Bhutan, under a clear sky, on golden ground. Taken straight from our logo: the blue sky, the golden earth, the white kingdom between them.

Personality

Joyful

Bright, warm, smiling. Never stiff or bureaucratic.

Trustworthy

Organised, precise, transparent about prices and logistics.

Rooted

Authentically Bhutanese — local guides, real places, real culture.

Premium

Calm, uncluttered, confident — worthy of a once-in-a-lifetime trip.

WHO WE SPEAK TO

International leisure travellers, families and groups, B2B travel partners, and visitors from Thailand and China seeking culture, festivals and nature.

WHAT THEY SHOULD FEEL

Welcomed, cared for and excited — confident that every detail is handled by people who know Bhutan.

DISTINCT IN THE MARKET

Where others go dark and serious, we pair a calm navy with the sunshine yellow of our logo — premium, but unmistakably **happy**.

The master logo

Our logo is a fixed piece of artwork. Always use the supplied master file — never retype the name, redraw the diamond or rebuild it from pieces.

- **The blue sky** — the clear Himalayan sky above the kingdom.
- **The golden ground** — the saffron of the national flag and of temple roofs.
- **The white silhouette** — the map of Bhutan, shaped like a snow-capped ridge.
- **The red wordmark** — "HAPPY" in a classic serif with "Holidays" in flowing script.
- **The diamond** — a square turned on its point; our signature shape across the whole identity.

The supplied logo is a 500 px PNG. Request the vector original (AI / SVG / PDF) from the designer before any print, signage or large-format job.

Clear space & minimum size

Clear space

Keep an empty zone around the logo equal to **X = ¼ of the logo's width** on every side. No text, image edges, other logos or busy patterns may enter it.

Minimum size

Website header
72–96 px wide

Digital minimum
72 px wide

Print minimum
25 mm wide

Below these sizes the script "Holidays" becomes unreadable. For favicons, app icons and social avatars, create a simplified mark (diamond + white Bhutan shape, no lettering) from the vector file.

Backgrounds

The logo is colourful and busy — it always sits on a calm, light surface. On navy and on photographs it goes on a white plate.

✓ Snow (white)

✓ Golden Mist

✓ Thimphu Night, on a white plate

✓ Photo, on a white plate

The white plate

A white square or rounded rectangle (12 px radius) with padding equal to the clear space. Use it in the navy website header, the footer, on hero photos and on dark print backgrounds.

Cloud & Golden Mist

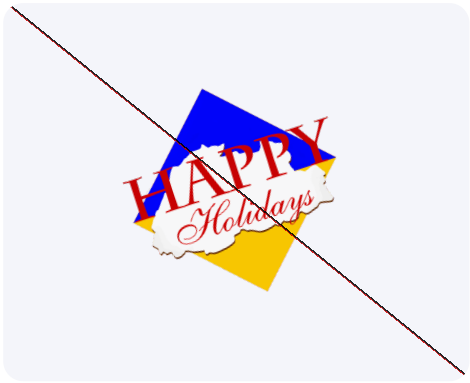

Both light grounds work without a plate. Avoid mid-tones and saturated fills — they compete with the diamond.

Logo misuse

Protect the logo. Each of these weakens recognition and makes the brand look careless.

× Don't stretch or squash

× Don't rotate

× Don't change the colours

× Don't add shadows or effects

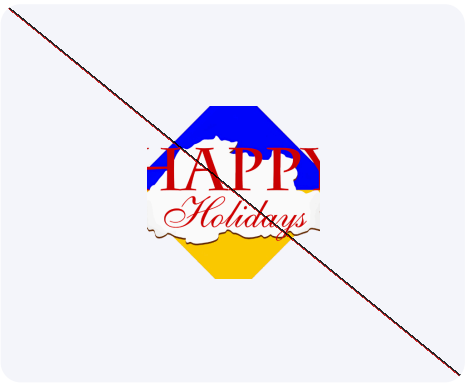

× Don't place on blue or yellow

× Don't place on navy without a plate

× Don't make it monochrome

× Don't crop the diamond

Core palette

A deep night-sky navy carries the brand; the three colours of the logo bring it to life.

Red accent on navy only

Text colour

On light grounds, all text is **Thimphu Night** — the navy doubles as our ink. Never use pure black.

Colour proportions

Light and navy sections alternate down every page — cinematic but easy to scan. Yellow is rare, so it always means "act".

Yellow = action

Every primary button — "Book now", "Enquire", "Plan my trip" — is Prayer Flag Yellow with navy text, on light and navy alike.

Blue stays off navy

Himalaya Blue merges with Thimphu Night (1.8 : 1). On navy, use Sky Glow for links and icons.

Red is a whisper

Druk Red marks offers, festival dates and "few seats left" — never large areas, never next to large blue fields.

Accessible pairings

Every text pairing meets WCAG 2.2 AA (4.5 : 1) or better. Use only these combinations for text.

Typefaces

HEADINGS · DISPLAY

Newsreader

Aa Gg *Rr* 26

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 0123456789

An elegant editorial serif made for screens. It echoes the classic serif of HAPPY in our logo and gives every headline the calm, storytelling voice of a travel magazine. Use Medium (500) for headlines, SemiBold (600) for small headings, and the *Italic (400)* to highlight one word.

BODY · INTERFACE

Instrument Sans

Aa Gg Rr 26

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 0123456789

A crisp, contemporary grotesque with open shapes and excellent legibility at small sizes — ideal for itineraries, prices, forms and flight schedules. Use Regular (400), Medium (500) and SemiBold (600).

GOOGLE FONTS EMBED

```
<link rel="preconnect" href="https://fonts.googleapis.com">

  wght@400;500;600&display=swap"
  rel="stylesheet">
```

Both families are free and open source (SIL Open Font License). Fallbacks: **Georgia** for Newsreader, **Segoe UI / Arial** for Instrument Sans — also use these in Word and PowerPoint when the brand fonts are not installed. Never use a script font: the script lettering belongs to the logo alone.

Sizes shown for web (px). Headlines in sentence case, never all caps; italicise at most one phrase per headline. Eyebrows are the only all-caps text. Left-align body copy; centre only short headings and CTAs.

Our signature shapes

The diamond

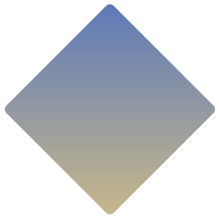

Taken from the logo's outline. Use it small and with purpose:

Bullet markers

Section dividers

One diamond photo crop per page

Maximum one large diamond per screen or spread. Never fill a background with diamonds.

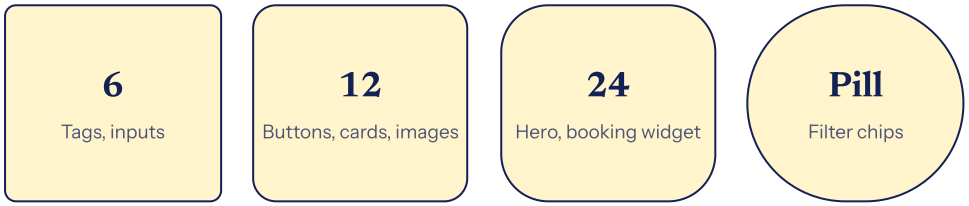

The Horizon Band

A thin tricolour stripe — Himalaya Blue, Prayer Flag Yellow, Druk Red — in the logo's proportions. It is our quiet signature, like a strip of prayer flag on the horizon.

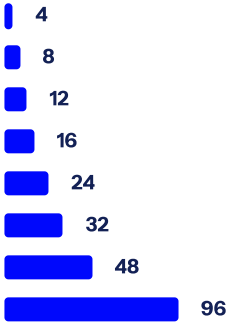

- 4 px tall on web; 2 mm in print.
- Use it at the top of the footer, under the hero, at the foot of documents and on the edge of business cards.
- Proportions 50 : 35 : 15 (blue : yellow : red). Always full-width or flush to an edge.

CORNER RADIUS

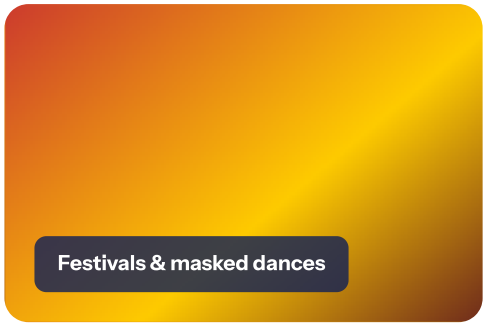

SPACING SCALE (PX)

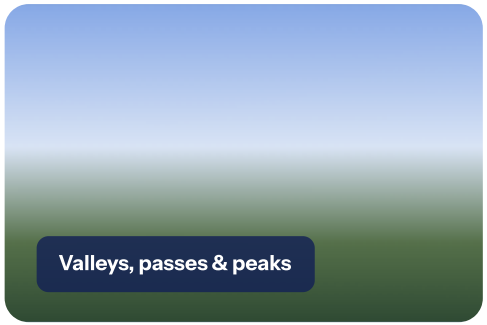

Section padding: 96 desktop · 48 mobile · Mobile side gutter 16.

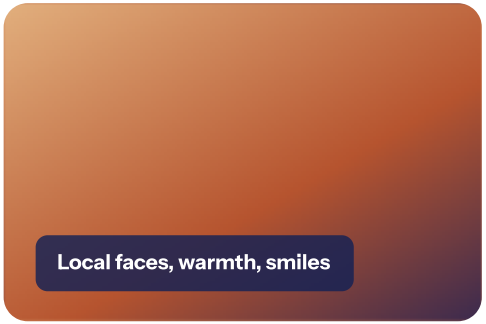

Real Bhutan, full of light

Do

Bright daylight, clear blue skies, natural colour. Real moments with guides and locals. Wide landscapes that show scale.

Overlays

For text over photos, use a Thimphu Night overlay at 55–70%, or a navy gradient fading to transparent. Never a black overlay.

Don't

Heavy filters, generic stock, photos of other countries, staged poses, or images of sacred sites where photography is not permitted.

07 · VOICE & TONE

Warm, personal, precise

We speak to "you"; we are "we".

Like a friendly local host — never a faceless agency.

Feeling first, facts next.

Open with the experience, follow with exact details: duration, inclusions, SDF, flights, hotel category.

Bhutanese, explained.

Use local names correctly — Dzong, Tshechu, Thimphu, Punakha — and explain them the first time.

Short, active buttons.

"Book this tour", "Enquire now", "View itinerary". No emoji on the website; one at most in social captions.

✓ SAY

"Wake up to prayer flags over Paro valley — then hike to Tiger's Nest with your private guide. Everything's arranged: permits, flights and your SDF."

× AVOID

"Our company offers comprehensive tour packages to Bhutan with various facilities. Contact us for more information!!!"

WORDS WE LOVE

happy · welcome · discover · journey · private guide · hand-picked · authentic · peace of mind

TONE BY CHANNEL

Website

Inspiring headlines, precise details. Every page ends with one clear yellow call to action.
